

**Where are the servers
that contain the very
heart of your company?**

Vital electronic documents, records, and files are the heart of your business. Studies show that a disturbing percentage of companies without a solid protection plan go out of business within a short period of time after catastrophic data loss.

Call now to schedule a tour of our facility. We can show you how affordable it is to protect your valuable data and give you peace of mind. Visit eDataCenter today!

of Your Business**

www.eDataCtr.com

Security

- Multi-tiered security system
- 24/7 security personnel with fully controlled access into the facility
- Minimal windows in office area and no exterior windows in data center space
- Customer-defined access lists, visitation logs, and strict identification logs
- Camera monitoring 24/7 (CCTV) throughout facility
- 24 hour digital recording / 30 day digital video storage
- Biometric palm scanner and card reader control access to data center
- Locked cabinets for your server security
- Motion sensors throughout the building activate alarms and cameras to record events
- High definition, resolution and back-light compensating security cameras

Network and Connectivity

- 99.99% network uptime guarantee
- Fully meshed and redundant network powered by flagship Cisco products
- Redundant and physically separate internet connections
- Burstable bandwidth solutions available along with various speed options

Building Power

- Highly reliable with built-in redundancy to guarantee continuous operation
- Designed with the future needs of customer in mind
- Multiple diesel generators and integrated UPS systems ensure uninterrupted power to your servers
- Clean AC power provided by APC power conversion and management systems
- Generator backup to 100% of customer peak load with up to 36-hour fuel supply and guaranteed refueling
- Building located on Priority One Power Grid

Cooling & Environmental Controls

- Design ensures a stable environment for the customer and early maintenance to prevent equipment failure
- Constant 70 degree ambient room temperature guarantee (+/- 5 degrees)
- All environmental control equipment is continuously monitored
- Air distribution from within the rack systems eliminates the need for “hot spot” control

Network Operations Center and Data Center Staff

- 24/7 support team
- Centralized monitoring of UPS, AC power, PDU, cooling system, temperature, humidity, security, fire prevention, and overall network operation
- Other services may be available upon request
